

3PGCIC-2016

The 11-th International Conference on P2P, Parallel, Grid, Cloud and Internet Computing

November 5-7, 2016, Soonchunhyang (SCH) University, Asan, Korea

In conjunction with the [BWCCA-2016](#) International Conference

Call for Papers

P2P, Grid, Cloud and Internet computing technologies have emerged as new paradigms for solving complex problems by enabling large-scale aggregation and sharing of computational, data and other geographically distributed computational resources. Rapid advances are being reported by many researchers and forums as regards understanding numerous issues in such paradigms, from theoretic to application aspects. The continuous development of Internet and the construction of new P2P and Grid and Cloud computing infrastructures are making possible the development of large scale applications from many fields of science and engineering.

The aim of this conference is to present innovative research results, methods and development techniques from both theoretical and practical perspectives related to P2P, Grid, Cloud and Internet computing.
