

BWCCA-2022

The 17-th International Conference on Broadband and Wireless Computing,
Communication and Applications

October 27-29, 2022, Polytechnic University of Tirana, Albania

In conjunction with the 3PGCIC-2022 International Conference

Call for Papers

Communication networks of today are going through a rapid evolution. Different kinds of networks with different characteristics are emerging and they are integrating in heterogeneous networks. For these reasons, there are many interconnection problems which may occur at different levels in the hardware and software design of communicating entities and communication networks. These kinds of networks need to manage an increasing usage demand, provide support for a significant number of services, guarantee their QoS, and optimize the utilization of network resources. Therefore, architectures and algorithms in these networks become very complex and it seems imperative to focus on new models and methods as well as mechanisms, which can enable the network to perform adaptive behaviors. The aim of BWCCA is to present the innovative research and technologies as well as developments related to broadband networking, mobile networking, wireless communications and applications.
